LAMINATES

VIRGOISM

PASSION WITH EXCELLENCE

The Virgo Group of companies constantly looks out for innovation and challenges in industry which it meets with its passion to excel in whatever it does.

Across all its group companies, it maintains a philosophy of reaching out to perfection, no matter what it takes, whether high-end resources or a superlative manpower.

With a team size of over 1000+ employees, Virgo Group employees all over the world continue to work together in a rewarding environment to achieve the objectives the company was founded upon. Long before there were government-issued regulations concerning the protection of the environment, Virgo Group had already invested in "Earth Friendly" initiatives. These included reforestation programmes and elimination of the use of tropical woods and harmful, ozone-damaging chemicals. Weighing its actions on a philosophical pedestal, Virgo today has evolved into a firm that has been generating optimum profit through total satisfaction of customers, suppliers, employees and society. A recipient of the ISO 14001 certifications, Virgo continues to invest in new technologies that can reduce the environmental impact of its manufacturing processes. Why?

Because it is the right thing to do.

VIRGO[®]
LAMINATES

VIRGOISM

Virgoism redefines

laminates as an
emotion. It is about
expressing one's
true individuality.

It is a concept that
embraces design
as an experience of
emotion.

VIRGO[®]
LAMINATES

SOLID STATE OF MIND

A solid state of mind is a rigidity in one's beliefs and aesthetic views. As one believes that beauty lies within the eye of the beholder.

Textures are the most personal aspect of any design. Textures can be used to convey emotions and memories, or simply create the scene. A texture is not just visual, it evokes emotions.

The background features a light gray grid of squares. Overlaid on this grid is a large, right-angled triangle in the bottom-right corner. The triangle is filled with a vibrant red color and a dense pattern of small white dots, creating a halftone or dotted texture. The text is centered horizontally and partially overlaps the grid and the triangle.

Emotional contagion occurs when people's emotions, thoughts, and behaviors overlap. Synchronisation is when similar emotions result in similar behaviors in two or more individuals.

THE UNPREDICTABLE EMOTION

Patterning is a recurring form of design or art work. The form can be repetitive and predictable. It can evoke one's emotion unpredictability.

Metal laminates are not suitable for areas subjected to heavy duty wear such as horizontal working surfaces. Due to the nature of the metal foil, metal laminates are not suitable for wet or humid areas. They are intended for use in indoor vertical applications where they are protected from moisture, humidity and direct sunlight.

MAINTENANCE GUIDE

Virgo® Laminates are designed to last a long time with proper care and usage. Below are some guidelines on how to maintain and care for your laminates.

Selecting the correct finish

We recommend to consider the application and use of the surface before selecting the laminate. Standard General Purpose Grade laminates are suitable for most interior use. Textured surfaces can be used for both vertical and horizontal applications. Gloss and metal laminates are not recommended for heavy-duty applications such as counter tops.

Cleaning

Virgo® Laminates are very easy to maintain and clean. For cleaning of stains and routine laminate maintenance, use a clean, damp, non-abrasive cloth and mild detergent or soap. Avoid the use of strong chemicals such as bleach, organic detergents and abrasive sponges that can discolour and scratch the laminate surface. For grease stains or attached dirt, clean with a 50-50 mix of solvent and alcohol using a clean, non-abrasive cloth. This way, the laminate will be free of stains without affecting the original colour and design.

Protection against scratch and impact

Virgo® Laminates are resistant to scratches and impact under normal use conditions. If any cutting activities are to be done on the laminate surface, an appropriate cutting board should be used to avoid damage to the laminate surface. It is also not recommended to chop, slice, pound or hammer directly on the laminate.

Protection against heat and light

Virgo® Laminates are manufactured for indoor applications and should not be exposed to sunlight or temperatures above 130°C. When placing hot objects such as frying pans, pots, and iron, use a trivet or protective insulated material to protect the laminate surface against direct heated objects.

Protection against chemicals

Virgo® High Pressure Laminates are not recommended for laboratory applications where oxidized chemicals, alkali and strong acids are used. Cleaning agents that contain acid, alkali or sodium hypochlorite should not be used for maintaining the laminate surface.

are available for customisation.

Selected items are available with stocks in black.

VIRGO[®] Digital

LAMINATES

Digital Print Laminates by Virgo[®] allow designers to explore customised graphics to be printed and produced in a High Pressure Laminate. They are as diverse as the applications for which they are used for.

Technical Specification

Grade:

Standard General Purpose Grade, other grades are available on indent basis

Size:

1220mm x 2440mm

Thickness:

0.8mm unless otherwise specified

All Virgo[®] Laminates conform to the requirements of BS EN 438

Certifications

Singapore Green Label

042-057-3032

Environmentally Improved
Low Emission Low Toxicity

FSC

CE Mark

GreenGuard Gold

ISO 9001

ISO 14001
